

## Phase-3

# E-COMMERCE WEBSITE

# Introduction

An e-commerce website is a platform that allows businesses to sell their products or services online. It is a type of electronic commerce that enables customers to purchase goods or services from the comfort of their own homes. E-commerce websites are built to connect shoppers to products or services for trading online. On the most basic level, they provide everything we need for online shopping. A business builds the website and lists the products or services they sell, along with prices .

## Website
